TECHNICAL SKILLS

Languages: JavaScript, C++

Web Technologies: HTML, CSS, JavaScript, C#

Runtime Environment: Node.js

Framework: Express.js

Libraries: React.js,

Database: MongoDB

EXPERIENCE

SEA TECHNOLOGIES | Full Stack Developer Intern (dec-2024- Mar-2025)

- Frontend Development with React.js: Using React.js, new modules were created and incorporated into already-existing projects, improving the usability and functionality of the application.
- API Integration: Frontend modules and backend APIs have been successfully linked to retrieve, process, and display dynamic data, guaranteeing smooth data transfer between the client and server.
- Code optimization and debugging: found and fixed problems in the current codebase to guarantee effective operation and compliance with React.js coding best practices.
- Enhancements to UI/UX: Worked in tandem with the design team to improve user interfaces, guaranteeing responsiveness and a better experience on all devices.
- Documentation and Team Collaboration: Closely collaborated with cross-functional teams to collect requirements, record workflows, and provide regular project progress reports.

EDUCATION

Chandigarh University	**July 2022 – August 2024**
Masters of Computer Applications - (MCA) – Percentage -74%	kharar, India
Himachal Pradesh University	**May 2019 – August 2022**
Bachelor of Computer Applications – (BCA) - Percentage - 78%	Shimla, *India*

PROJECTS

Job Portal | JavaScript, Node.js, Express.js | Github
- The aim of our project is to develop a system that is meant to create a comprehensive and dynamic platform for job seekers and employers. **Allow employers to post job vacancies with details such as job title, description, location, and required skills (Only backend project).**

Personal Portfolio | React.js, JavaScript, CSS | Github
- Designed and developed a personal portfolio website to showcase skills, projects, and achievements. **Fully responsive design for all devices.**
- Live site here

User Authentication | React.js, C#, SQL |
- Developed a Web application one with front-end in HTML CSS JavaScript and second with React.js.
- Features like **CRUD operations** using data I retrieve from the **API** following **user authentication** has been added**.**
- Live site here

JS-Projects | HTML, CSS, JavaScript | Github
- Developed a site you have options like **Color changer, BMI generator, Digital clock, Keyboard check, Unlimited colors.**
- Live site here
